

University of Sri Jayewardenepura, Sri Lanka
Bachelor of Information and Communication Technology Semester 4
IIC 2223 Web Application Development
Group Project

You are required to submit the following artifacts for your completed full-stack web project. Submission must be made **only by the group leader**.

1. Project Presentation

- Prepare a presentation of approximately 10–15 slides
- (You may include more slides if necessary; no marks will be deducted).
- The presentation should include the following sections:
 - Group Members
 - Names and index numbers of all members
 - Project Overview
 - Brief description of the problem addressed and the solution
 - Requirements / Functionalities
 - Key features implemented in the system
 - Technologies Used
 - Frontend, backend, database, frameworks, libraries, tools, etc.
 - Significance / Novelty (if any)
 - Unique aspects, improvements, or innovative features
 - Future Work
 - Possible enhancements or extensions
 - Conclusion
 - Any other relevant information you consider important
 - Project Source Code Link

2. Project Source Code

- Submit the complete source code of the project, including:
 - Frontend source code
 - Backend source code
 - All essential configuration and supporting files
- Preferred submission method:
 - Upload the project to GitHub and share the repository link. Ensure the repository is public or accessible
- Alternative method:
 - If GitHub is not convenient, upload the source code to a code-sharing platform
- **Include the download/link on the last slide of the presentation**

How to Submit:

- Convert the presentation to PDF format
- Rename the PDF file using the group leader's index number
Example: ict23801.pdf
- Submit the PDF file to the LMS using the provided submission link
- Submission must be made only by the group leader.
